DISTRICTS 6 AND 8 DRIFT GILLNET FISHERIES 2015 SEASON REPORT

Tom Kowalske ADFG December 2015

Figure 1.

District 6 Season Summary

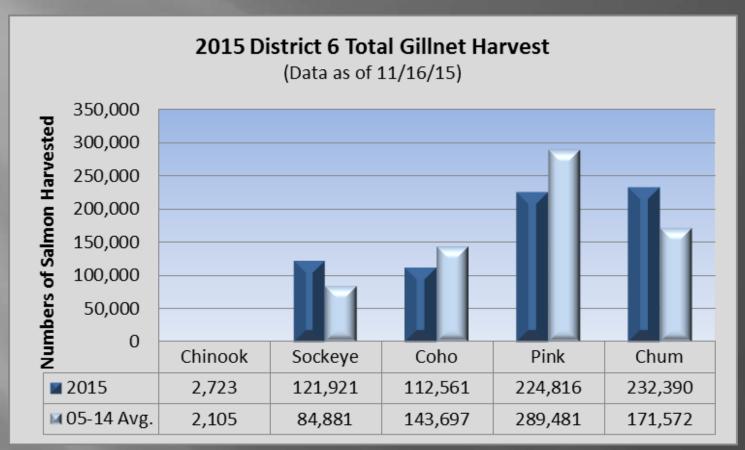

Figure 2.

- Coho and pink salmon harvest below average
- Chinook, sockeye, and chum salmon harvest above average

District 6 Preliminary Stock Composition

Chinook

Estimated 69% hatchery

Sockeye

- Estimated 22,600 Stikine River fish or 19% of harvest
 - 19,100 fish from 106-41, 27% of harvest
 - 3,500 fish from 106-30, 7% of harvest

Coho

Estimated 51% hatchery

Chum

Estimated 81% of hatchery origin

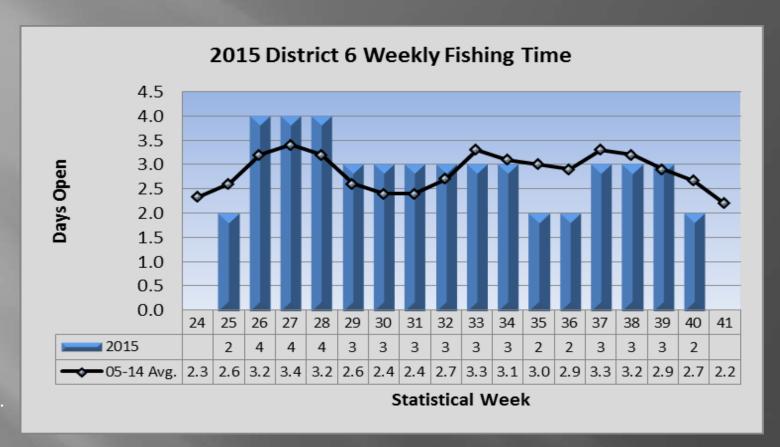

Figure 3.

- 47 total days (June 15 September 29)
- Below 05-14 average of 48.6 days
- Generally above average during the first half and below for the second half

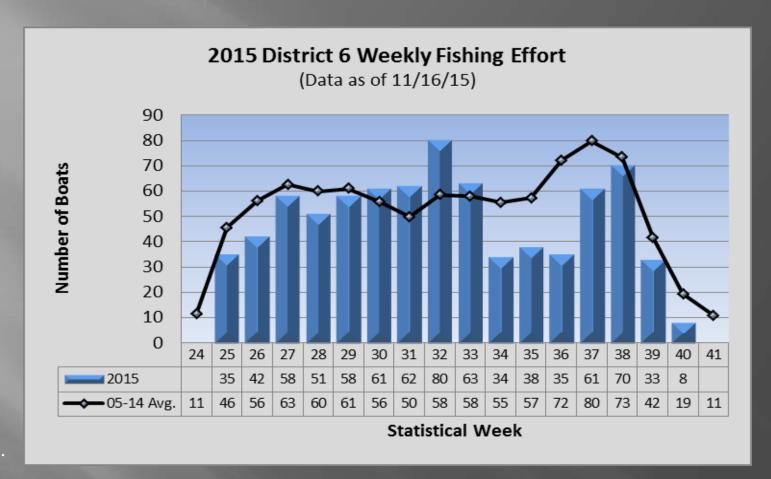

Figure 4.

- Weekly effort generally below average
- Greatest numbers of boats in SW32 with 80 boats

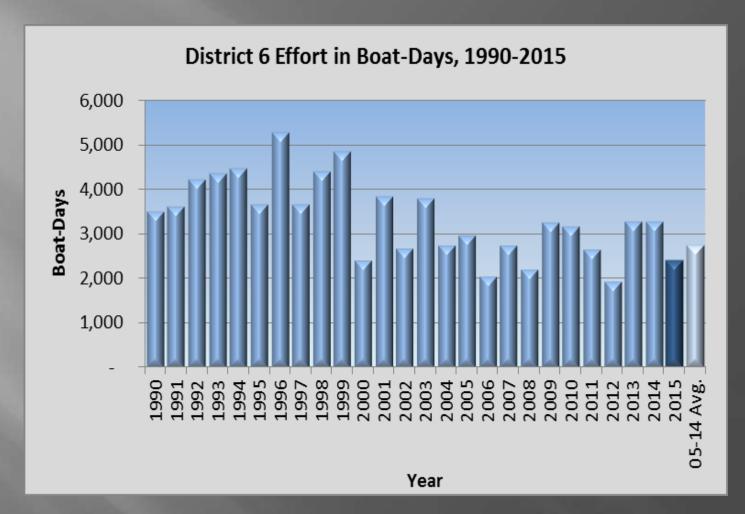

Figure 5.

■ Total season effort was 2,402 boat-days, 87% of 05-14 average

District 8 Season Summary

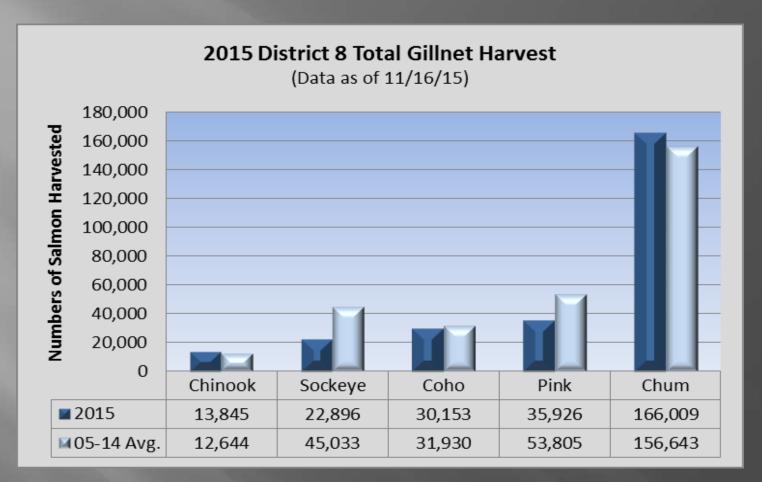

Figure 6.

- Chinook and coho salmon harvest near average
- Sockeye and pink salmon harvest below average
- Chum salmon harvest above average

District 8 Preliminary Stock Composition

- Chinook
 - Estimated 94% hatchery
- Sockeye
 - Estimated 16,400 Stikine River fish or 71% of harvest
- Coho
 - Estimated 23% hatchery
- Chum
 - Estimated 88% hatchery

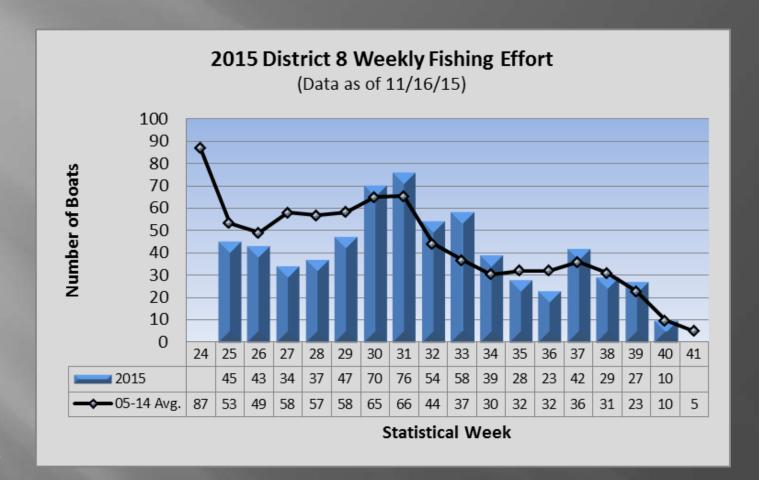

Figure 7.

- Weekly effort below average during sockeye management, then near average for the duration
- Greatest number of boats in SW 31–76 boats

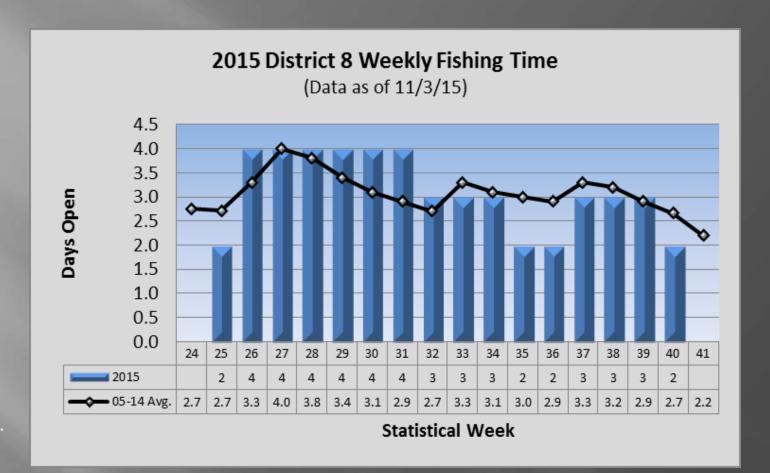

Figure 8.

- 50 total days (June 15 September 29)
- Below 05-14 average of 56 days

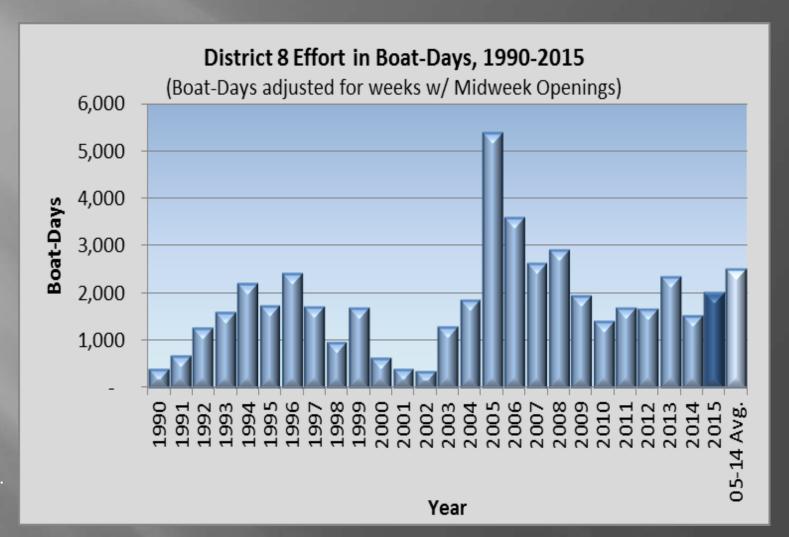

Figure 9.

 Total season effort was 1,992 boat-days, 80% of 05-14 average

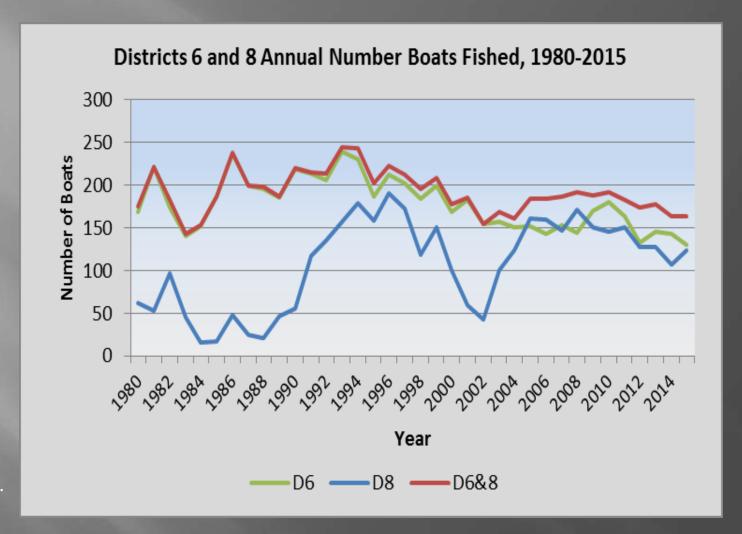

Figure 10.

- 163 total number of boats fishing in Districts 6&8
- Below the 05-14 average of 182 boats

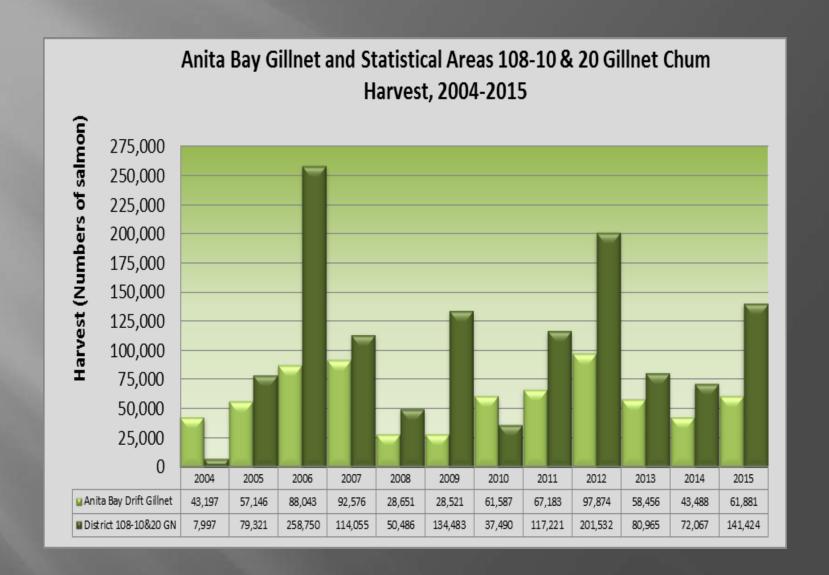

Figure 11.

District 8 Chinook Fishery

District 8 Chinook

- Preseason forecast of 30,200 large Stikine Chinook and inseason forecast ranging between 28,100 and 29,500
- U.S. AC not large enough to prosecute directed commercial fisheries during 2015
 - U.S. AC based on inseason forecasts ranged from 210 to 507 fish
 - District 8 sport fishery was liberalized
 - Spring Troll Fishery in District 8 restricted to hatchery access areas
 - U.S. Subsistence fishery opened on May 15
 - Area restrictions implemented in the gillnet fishery in District 8 for SW25 sockeye opening
- Postseason Stikine Chinook salmon run size estimate:
 29,300 fish
 - U.S. AC of 480

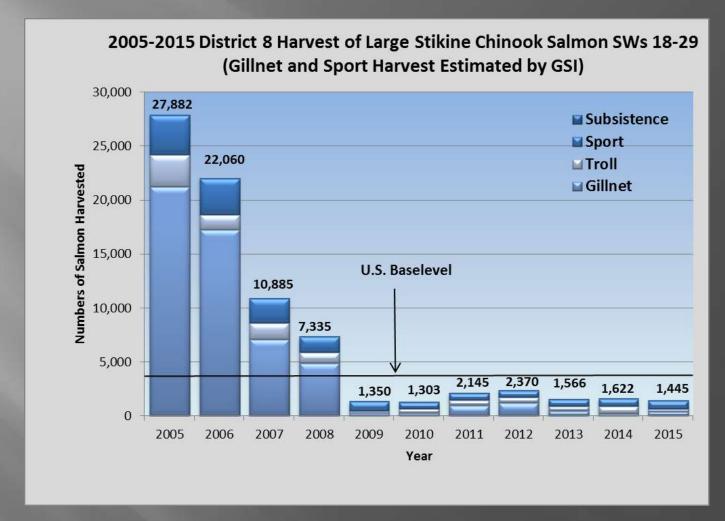

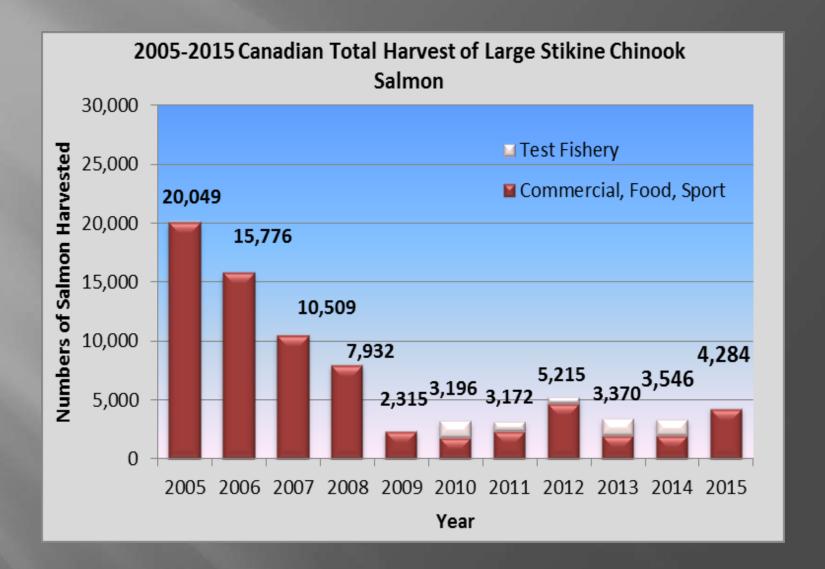

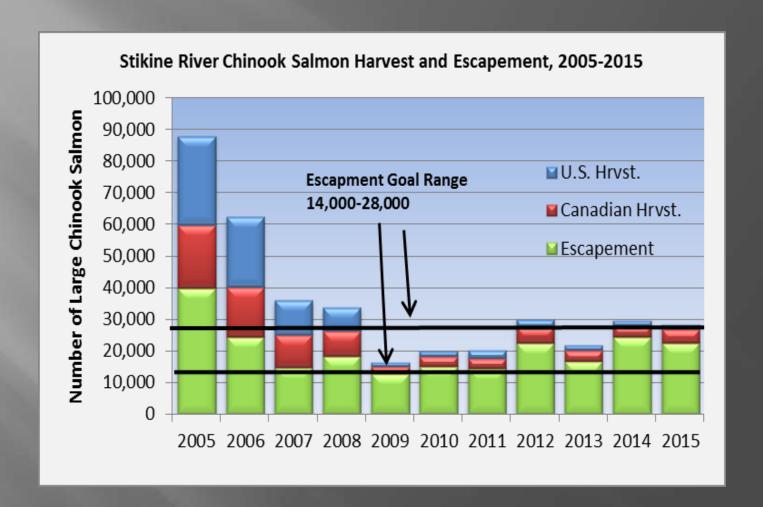

Figure 12.

 U.S. catch of 1,445 large Stikine Chinook includes: 781 sport, 378 gillnet, 246 troll, and 40 subsistence

Sockeye Management Summary

Sockeye Management

- Weeks 25 through 31 (June 14 August 1)
- Closed waters of note
 - Stikine flats remained closed for duration of season
 - SW 25-expanded closed waters in District 8 for Stikine Chinook salmon
 - Not as extensive as past years
 - Effort targeting sockeye low all season
 - Run on-time and protracted

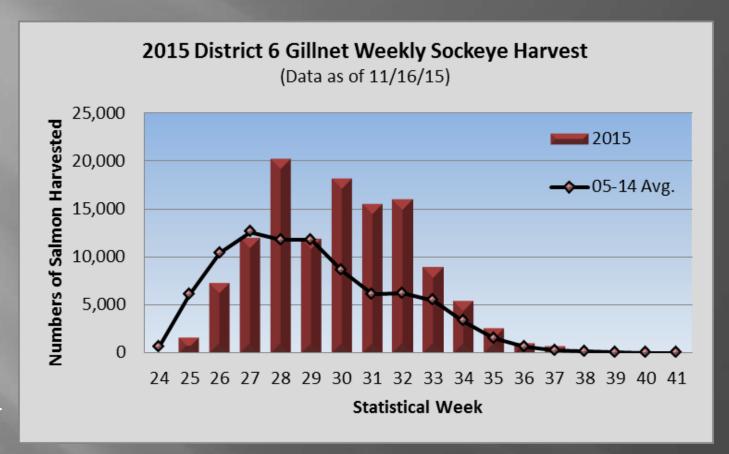

Figure 15.

• Well above average sockeye harvest in District 6 with a total of 121,900 fish, 144% above average

Sockeye Escapement

- Stikine
 - Tahltan Escapement: 30,000 (at upper end of range)
 - Mainstem-~39,000 (near upper end of range)
- Island Stocks
 - Above Average
- McDonald Lake
 - 70,200 Escapement (within 55,000-120,000 goal)

Pink Salmon Management

Pink Salmon Management

- Weeks 32 through 36 (August 2– September 5)
- Well below average effort in District 6, near average in District 8
- Below average Pink salmon harvest in both districts
